MIAMI, July 6, 2020* – Cruise industry leaders Royal Caribbean Group (NYSE: RCL) and Norwegian Cruise Line Holdings Ltd. (NYSE: NCLH) announced a collaboration to develop enhanced cruise health and safety standards in response to the global COVID-19 pandemic.

The companies have asked Governor Mike Leavitt and Dr. Scott Gottlieb to serve as co-chairs of a newly formed group of experts called the “Healthy Sail Panel.” The panel is tasked with collaboratively developing recommendations for cruise lines to advance their public health response to COVID-19, improve safety, and achieve readiness for the safe resumption of operations.

The expert panel has been working for nearly a month and will offer its initial recommendations by the end of August. The cruise lines said its work will be “open source,” and could be freely adopted by any company or industry that would benefit from the group’s scientific and medical insights.

“This unprecedented disease requires us to develop unprecedented standards in health and safety,” said Richard D. Fain, chairman and CEO, Royal Caribbean Group. “Bringing aboard these respected experts to guide us forward demonstrates our commitment to protecting our guests, our crews and the communities we visit.”

“We compete for the vacationing consumer’s business every day, but we never compete on health and safety standards,” said Frank Del Rio, president and CEO, Norwegian Cruise Line Holdings Ltd. “While the cruise industry has always had rigorous health standards, the unique challenges posed by COVID-19 provide an opportunity to raise the bar even higher.”

(more)
"Health and safety are the highest priority for all CLIA cruise line members as demonstrated by this initiative on the part of two of our largest members. We commend this and parallel efforts of all of our members, large and small, who are working tirelessly to develop appropriate protocols based on input from health authorities and medical experts in the U.S. and abroad,” said Kelly Craighead, president and CEO of Cruise Lines International Association (CLIA).

Fain and Del Rio said they initiated the panel to assure the plans they will submit to the U.S. Centers for Disease Control and Prevention (CDC) and other regulators apply the best available public health, science and engineering insights. The work of the panel will be shared with the entire industry and regulators.

“In convening the Healthy Sail Panel, we sought the participation of a diverse group of leading experts in areas of science and public health that are directly relevant to the considerations listed by the No Sail Order,” said Governor Leavitt. “We view our work as a profoundly important public health effort. The health and safety of passengers, crew and the communities that cruise ships visit will be the principal focus of this project.”

Dr. Gottlieb said, “We know that the public health issues that must be addressed are complex, and in some areas, tackling them will require novel approaches. Our goal in assembling this team of leading experts was to develop best practices that can improve safety and provide a roadmap for reducing the risks of COVID-19.”

The panel is co-chaired by Governor Leavitt, former Secretary of the U.S. Department Health and Human Services (HHS), and Dr. Scott Gottlieb, former commissioner of the U.S. Food and Drug Administration (FDA). The panel’s members are globally recognized experts from various disciplines, including public health, infectious disease, biosecurity, hospitality and maritime operations.
The members of the expert panel are:

**Governor Mike Leavitt**

Mike Leavitt was a three-term Governor of Utah and served as Administrator of the EPA and Secretary of HHS under President George W. Bush. He is the founder of Leavitt Partners, a firm that provides investment support, data and analytics, member-based alliances, and direct services to clients to support decision-making strategies in the value economy.

**Dr. Scott Gottlieb**

Dr. Scott Gottlieb was the Commissioner of the FDA from 2017-2019 and served as the agency’s Deputy Commissioner for Medical and Scientific Affairs from 2005-2007. He is a physician trained in internal medicine and is currently a resident fellow at the American Enterprise Institute.

**Helene Gayle, M.D., M.P.H.**

Dr. Gayle is CEO of the Chicago Community Trust, one of the nation's leading community foundations. Prior to this role, for almost a decade, she was president and CEO of CARE, a leading international humanitarian organization. An expert on global development, humanitarian and health issues, Dr. Gayle spent 20 years with the CDC, working primarily on HIV/AIDS. She worked at the Bill & Melinda Gates Foundation, directing programs on HIV/AIDS and other global health issues. She also launched the McKinsey Social Initiative (now McKinsey.org), a nonprofit that builds partnerships for social impact. Dr. Gayle serves on public company and nonprofit boards, including The Coca-Cola Company, Colgate-Palmolive Company, the Brookings Institution, the Center for Strategic and International Studies, New America, the ONE Campaign, the Federal Reserve Bank of Chicago and the Economic Club of Chicago. She is a member of the Council on Foreign Relations, the American Public Health Association, the National Academy of Medicine, the National Medical Association and the American Academy of Pediatrics.

**Julie Gerberding, M.D., M.P.H.**

Dr. Julie L. Gerberding is Executive Vice President and Chief Patient Officer for Merck, leading all aspects of strategic communications, global public policy, population health and patient engagement. A former head of the CDC and a world-renowned public health expert, Dr. Gerberding is deeply committed to achieving sustainable global health impact and tackling some of the most challenging health priorities of our time. This includes addressing critical issues such as affordable access to important therapies, advocating for health policies that promote and sustain innovation of new medicines and vaccines, and improving maternal mortality through the Merck for Mothers program — a public-private partnership helping to meet the United Nations' Sustainable Development Goal to reduce maternal mortality.

*(more)*
Prior to joining Merck, Dr. Gerberding served as the Director of the CDC from 2002-2009 and was the first female to hold that position. While at the agency, she led more than 40 emergency responses against crises such as anthrax, SARS, bird flu, foodborne outbreaks and natural disasters. Previously, Dr. Gerberding was a tenured faculty member in Infectious Diseases at the University of California at San Francisco (UCSF). She continues as an Adjunct Associate Clinical Professor of Medicine at UCSF.

**Steven Hinrichs, M.D.**

Dr. Steven Hinrichs is Professor and Chair of the Department of Pathology and Microbiology at the University of Nebraska Medical Center in Omaha, former Director of the University of Nebraska Center for Biosecurity and the former Director of the Nebraska Public Health Laboratory (NPHL). He is the principal investigator of multiple national awards from the Association of Public Health Laboratories, CDC and the U.S. Department of Defense for the development of an outreach program to extend training and expertise in the early recognition of biological warfare agents. He has published greater than 180 papers in basic science and medical journals.

**Michael Osterholm, M.D., Ph.D.**

Michael Osterholm is one of the nation’s foremost experts in public health, infectious disease and biosecurity. As the director of the Center for Infectious Disease Research and Policy at the University of Minnesota, he is an international leader on the world’s preparedness for pandemics. He has led numerous investigations into internationally important disease outbreaks, including foodborne diseases, hepatitis B in healthcare settings and HIV infection in healthcare workers, and he is a frequent consultant to the World Health Organization, the National Institutes of Health, the FDA, the U.S. Department of Defense and the CDC. From 2001 to 2005, Dr. Osterholm served as a special advisor to the Secretary of HHS on issues related to bioterrorism and public health preparedness. From June 2018 through May 2019, he served as a Science Envoy for Health Security on behalf of the U.S. Department of State. He has also been appointed to the National Science Advisory Board on Biosecurity and the World Economic Forum’s Working Group on Pandemics, among other prominent advisory positions.

**Stephen Ostroff, M.D.**

Dr. Ostroff brings years of experience in public health, having served at high-level positions at the FDA and the CDC. He was the Acting Commissioner of the FDA from 2015-2016, and before that served as the FDA’s chief scientist. Ostroff joined the FDA in 2013 as chief medical officer in the Center for Food Safety and Applied Nutrition and senior public health advisor to the FDA’s Office of Foods and Veterinary Medicine. Prior to that he served as deputy director of the National Center for Infectious Diseases at the CDC, where he was also acting director of the CDC’s Select Agent Program. While at the CDC, he focused on emerging infectious diseases, food safety and coordination of complex outbreak response.
He retired from the Commissioned Corps of the U.S. Public Health Service at the rank of Rear Admiral (Assistant Surgeon General). Ostroff was also the director of the Bureau of Epidemiology and acting physician general for the Commonwealth of Pennsylvania and has consulted internationally on public health projects in South Asia and Latin America. Ostroff graduated from the University of Pennsylvania School of Medicine in 1981 and completed residencies in internal medicine at the University of Colorado Health Sciences Center and preventive medicine at the CDC.

William Rutala, Ph.D., M.S., M.P.H.

Dr. Rutala has experience medically managing a variety of diseases and extensive experience studying epidemiology and virology, particularly managing outbreaks and emerging pathogens. Dr. Rutala’s research interests are the etiology and prevention of healthcare-associated infections with a special focus on disinfection and sterilization of reusable medical and surgical devices (e.g., endoscopes, surgical instruments). Other areas of active research include contribution of the hospital environment to disease transmission, hand hygiene, preventing transmission of infectious agents, including multiply-drug resistant organisms, prevention of healthcare-associated Creutzfeldt-Jakob Disease, investigation of healthcare-associated outbreaks, and new and emerging pathogens in healthcare.

Kate Walsh, Ph.D.

Dr. Walsh is Dean and E.M. Statler Professor at the School of Hotel Administration at Cornell University, a leader in education for the global hospitality industry. A professor of management, Dr. Walsh’s primary research is in organizational service design, leadership and the strategic investments of human capital. She has over 20 years of academic experience. In addition, Dr. Walsh has held a number of executive positions in hospitality human resources and is a former New York State certified public accountant. Dr. Walsh serves on the board of the American Hotel and Lodging Association.

Captain Patrik Dahlgren

Captain Patrik Dahlgren is the Senior Vice President of Global Marine Operations and Fleet Optimization for all Royal Caribbean Group global brands. Dahlgren’s seagoing experiences started as a bridge officer aboard tugboats, yachts and an array of cargo vessels and ferries. He rose through the ranks with over 15 years onboard Royal Caribbean International cruise ships, with his last seagoing command as Master of Oasis of the Seas and Quantum of the Seas. He was a lead contributor to the Quantum of the Seas development and received the esteemed RINA (Royal Institute of Naval Architects) award for its innovation and contributions to maritime safety.

(more)
Robin Lindsay

Robin Lindsay is the Executive Vice President of Vessel Operations for Norwegian Cruise Line Holdings Ltd. Lindsay was appointed to this position in January 2015. In this role, Lindsay is responsible for Marine & Technical Operations, Hotel Operations, Entertainment, Product Development, Port & Destination Services, Fleet Personnel, Out Islands and New Build & Ship Refurbishment for all three of the company’s brands – Norwegian Cruise Line, Oceania Cruises and Regent Seven Seas Cruises.

Prior to joining Norwegian Cruise Line Holdings Ltd., Lindsay served in a similar capacity as Executive Vice President of Vessel Operations at Prestige Cruise Holdings, the parent company of Oceania Cruises and Regent Seven Seas Cruises. Lindsay’s history with the company goes back to the inception of Oceania Cruises in 2003, where he joined as Senior Vice President, Hotel Operations and Vessel Operations. Lindsay earned his B.S. degree from Louisiana Tech University.

In addition, several experts will also serve as senior advisors to the panel, including Dr. Caitlin Rivers, who is a faculty member and epidemiologist at the Johns Hopkins Bloomberg School of Public Health and an expert in emerging infectious disease epidemiology and outbreak science, and Dr. Phyllis Kozarsky, who is a professor emerita of medicine in the Division of Infectious Diseases at Emory University School of Medicine and an expert in pre-travel health advice and education, global health, and the epidemiology of travel-related infections and infectious diseases. Dr. Kozarsky serves as an expert consultant to the Division of Global Migration and Quarantine in travelers’ health with the CDC.

*Updated August 2020*
About Royal Caribbean Group

Cautionary Statement Concerning Forward-Looking Statements
Some of the statements contained in this release are “forward-looking statements” within the meaning of the U.S. federal securities laws intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. All statements other than statements of historical facts contained in this release, including, without limitation, those regarding business strategies, plans, and objectives for future operations (including those regarding efforts made by the panel and future health and safety protocols) are forward-looking statements. Many, but not all, of these statements can be found by looking for words like “expect,” “plan,” “will,” “may,” and similar words. Forward-looking statements do not guarantee future performance and may involve risks, uncertainties and other factors which could cause actual results, performance or achievements to differ materially from the future results, performance or achievements expressed in these forward-looking statements. Examples of these risks, uncertainties and other factors include, but are not limited to the impact of: the spread of epidemics, pandemics and viral outbreaks and specifically, the COVID-19 outbreak, including its effect on the ability or desire of people to travel (including on cruises); the ability to develop strategies to enhance health and safety protocols to adapt to the current pandemic environment’s unique challenges once operations resume and to otherwise safely resume operations when conditions allow; coordination and cooperation with the CDC, the federal government and global public health authorities to take precautions to protect the health, safety and security of guests, crew and the communities visited and the implementation of any such precautions; and other factors set forth under “Risk Factors” in each respective company’s most recently filed Annual Report on Form 10-K, Quarterly Report on Form 10-Q and subsequent filings with the Securities and Exchange Commission. It is not possible to predict or identify all such risks. There may be additional risks that are considered immaterial or which are unknown. The above examples are not exhaustive and new risks emerge from time to time. Such forward-looking statements are based on current beliefs, assumptions, expectations, estimates and projections regarding present and future business strategies and the environment in which we expect to operate in the future. These forward-looking statements speak only as of the date made. We expressly disclaim any obligation or undertaking to release publicly any updates or revisions to any forward-looking statement to reflect any change in our expectations with regard thereto or any change of events, conditions or circumstances on which any such statement was based.
